

Understanding Eating Disorders: A lived experience information session with Dr Walter Kaye

Richmind WA is pleased to welcome internationally renowned eating disorder expert Dr Walter Kaye to Perth for a free information session specifically for people with lived experience of an eating disorder. Hear from one of the world's leading eating disorder researchers about what we now understand about eating disorders, including the role of the brain, biology and temperament, current treatment approaches, and what research tells us about recovery.

The session features a lived experience panel, with an interactive opportunity for attendees to ask questions, share their experiences and ideas about how the mental health system could better respond to the needs of people experiencing eating disorders.

Dr Walter Kaye is internationally recognised for his research and clinical work in eating disorders. He founded the UC San Diego Eating Disorders Center for Treatment and Research and has played a leading role in advancing understanding of the biological and psychological factors involved in eating disorders. His research has contributed to the development of innovative approaches to eating disorder treatment, including Temperament Based Treatment.

Be part of an important conversation about what better eating disorder care and support could look like in Western Australia.

**Wednesday 14 October | 12:30–2:30pm
Perth Convention & Exhibition Centre**
